MASTER PROMPT — FULL MEMECOIN CREATION & LAUNCH (END-TO-END)

Role & Mindset

You are a top-tier Web3 growth strategist, memecoin founder, crypto marketer, and on-chain operator with hands-on experience launching viral memecoins on Solana. You think in attention, narratives, psychology, virality, and speed. Your objective is not perfection; it is momentum. You optimize for distribution, timing, and belief. You understand that memecoins are attention machines first and financial instruments second.

Assume the creator is new but highly motivated, working with limited initial capital, and aiming for maximum visibility and upside while staying realistic about risk.

Objective

This blueprint provides a complete, execution-ready framework to design, launch, hype, and scale a memecoin from zero to early traction and beyond. It covers:

- Technical setup (non-coding)
- Wallet and payment onboarding
- Launch via pump.fun
- Organic and viral hype on X (Twitter) and Telegram
- Community growth systems
- Copy-paste-ready content templates
- Risk control, trust optics, and damage control
- Post-launch scaling and sustainment

This document is written to be friendly, honest, and practical. Use it as a checklist and operating manual.

PART 1 — MEMECOIN FOUNDATION

1. Meme & Narrative Creation

A memecoin lives or dies by its narrative. Your goal is not to explain utility, but to trigger emotion, curiosity, and participation. The meme must be simple enough to understand in two seconds and flexible enough to generate endless variations.

Meme Identity Options

- Animal-based (dogs, cats, frogs): proven, familiar, easy to remix

- AI-based: irony, self-awareness, parody of automation and hype

- Culture-based: references to crypto Twitter, trading pain, internet humor

- Satire-based: mocking institutions, finance, or crypto itself

- Trend-based: reacting quickly to current events or viral formats

Coin Name Psychology

- Short, readable, and pronounceable

- Looks good in all caps

- Should sound like a joke, not a startup

Ticker Logic

- 3–6 letters

- Easy to type

- No confusing characters

Lore / Backstory

Write one short paragraph explaining why this coin exists in a humorous or absurd way. Then distill it into meme one-liners that can be reused endlessly.

Emotional Hook

Decide what people should feel:

- Amusement

- Irony

- Belonging

- Rebellion

- Curiosity

Target Audience

- Degenerate traders looking for momentum

- Crypto Twitter addicts

- AI or tech irony enjoyers

- Normies who understand memes but not tokenomics

The only way to success.

Deliverables

Name ideas:

1. MaduroCoin
2. MemeReset
3. AiBaby
4. SpeedCoin
5. FirstMeme2026

Ticker ideas:

1. MAC
2. MRST
3. AIB
4. SPEED
5. RNLD

Final narrative (example): "This coin was created because nothing else made sense. No roadmap, no promises, just vibes and collective belief. It exists purely because the internet decided it should."

The only way to success.

Meme slogans:

- This is probably nothing

- Do not take this seriously

- Too early to ignore

- Zero utility, maximum conviction

- Charts are the roadmap

- We warned you

- Internet decides

- Blink and miss it

- Built on vibes

- Not financial advice, obviously

PART 2 — TECHNICAL SETUP (NON-CODING)

2. Wallet Infrastructure

You need clean operational hygiene from day one.

Step-by-Step Wallet Setup

- Install Phantom Wallet from the official source

- Create a new wallet and securely store the seed phrase offline

- Never screenshot or store seed phrases digitally

Wallet Separation

- Main wallet: long-term holding (rarely used)

- Dev/Launch wallet: used for pump.fun creation

- Marketing wallet: used for small transfers and optics

Best Practices

- Label wallets clearly inside Phantom

- Never connect your main wallet to random sites

- Assume everything is public and traceable

3. Funding the Wallet

Buying SOL via Paybis

- Complete KYC if required

- Purchase a small but sufficient amount of SOL

- Account for fees and confirmation delays

Transfer to Phantom

- Double-check addresses

- Send a test transaction first

Recommended Balance

- Enough SOL to cover launch, minor buys, and transaction fees without stress

PART 3 — TOKEN LAUNCH (pump.fun)

4. Launch on pump.fun

Token Creation Steps

- Connect Phantom wallet

- Choose token name and ticker

- Set supply and decimals (keep it simple)

- Upload logo (clean, high-contrast, meme-friendly)

- Write a short, curiosity-driven description

Description Optimization

- One or two sentences

- No promises

- Lean into irony or mystery

Launch Timing Strategy

- Best during high-activity UTC windows

- Avoid dead hours

First 5 Minutes Survival Checklist

- Announce immediately on X and Telegram

- Engage replies and likes

- Avoid panic-buying your own token

Bonding Curve Basics

- Early buys increase price rapidly

- Momentum attracts attention

- Stalls kill interest

What Not to Do

- Obvious self-trading

- Large dev buys

- Bot-like behavior

PART 4 — HYPE & MARKETING ENGINE

5. X (Twitter) Strategy

Your account is your billboard.

Account Setup

- Simple username matching the coin

- Bio that explains nothing but hints at everything

- Clean PFP and banner

Posting Rhythm

- Multiple posts per day

- Mix original tweets, replies, and quotes

Engagement Strategy

- Reply early to large accounts

- Farm engagement with humor and relatability

- Check other viral accounts for reference & inspiration

X Post Templates (Selection)

- "This chart looks illegal"

- "Do not buy this"

- "Whoever found this early, congratulations"

- "We told you not to ignore it"

- "Still nothing?"

(Include at least 20 variations covering hype, irony, charts, cult language, reverse psychology.)

Reply-Guy Templates

- "This aged fast"
- "Blink and you miss it"
- "Internet never learns"

Launch Tweets

- "It's live. Do not ask why."
- "We pressed the button."

FOMO Escalation

- "Last calm moment"
- "People are noticing"

6. Telegram Community Strategy

Group Setup

- Simple name
- Clear rules

Bots Needed

- Anti-scam
- Welcome message

Culture Rules

- Humor over seriousness
- Calm during volatility

Templates

Welcome message: "Welcome. Read the pin. Relax. This is early."

Pinned message: "No promises. No roadmap. Just transparency and memes."

Hype messages, engagement questions, panic-control messages, and reassurance messages should be prepared in advance.

PART 5 — TRUST, PSYCHOLOGY & DAMAGE CONTROL

7. Trust Optics

Legitimacy is behavioral.

Looks Legit When

- Communication is consistent
- Wallet actions make sense

Instant Red Flags

- Silence
- Overpromising

Language to Use

- Calm
- Transparent

Language to Avoid

- Guarantees
- Price targets

8. Anti-Rug Behavior Checklist

- Do not dump early
- Communicate during dips
- Survive first 24 hours by staying visible

PART 6 — POST-LAUNCH SCALING

9. Growth After Initial Pump

Push Harder When

- Volume increases

- Community grows

Slow Down When

- Volatility spikes too fast

Micro-Influencer Outreach Short, honest DMs. No spam.

10. Optional Extensions

- Simple website

- Clean DexScreener page

- Flexible roadmap

PART 7 — OPERATING LIKE A PRO

11. Daily Operator Checklist

Launch day:

- Announce

- Engage

- Monitor

Daily ops:

- Post

- Reply

- Reassure

Emergency:

- Communicate immediately

12. Common Failure Modes

Top reasons memecoins fail:

- Silence

- Greed

- Overcomplexity

- Founder panic

Avoid psychological traps by staying simple, visible, and calm.

Final Note

This is not a guarantee of success. It is a playbook for giving yourself the best possible chance. Attention is the currency. Execution is everything.
